SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION 25X1

1. The Huta Bobrek, formerly Julian Foundry at Bobrek (Q 51/Y 47) was located south of the Beuthen (Bytom) (Q 51/Y 58) - Gleiwitz (Gliwice) (Q 51/Y 37) railroad line. The foundry consisted of a blast furnace plant, a steel works, a coke plant, a foundry plant, and a large rolling mill. In 1953, a new Soviet train of rollers was put into operation at the installation. The raw materials required for the foundry arrived by rail at the Bobrek railroad station. Four locomotives stationed at Beuthen were daily sent for shunting operations to the Bobrek railroad station. Frequently, complete trains of scrap iron and trailloads of iron ore arrived from the direction of Gleiwitz. Coke was also shipped by rail to the foundry; these shipments arrived from Waldenburg (O 51/H 07).
2. The blast furnaces produced pig iron, steel was produced from pig iron and scrap at the open-hearth plant. Iron profiles were manufactured at the rolling mill. Round bars of various dimensions, flat iron, three-cornered profiles, railroad rails, girders of various shapes were observed at the rolling mill. Iron or steel ingots were also shipped out. The foundry manufactured component parts for machines. Such parts were also delivered to the Bytomskie Zaklady Urzadzen Technicznych (Beuthen Works for Technical Equipment) at Karf (Q 51/Y 48).
3. The coking plant of the installation which apparently could not meet the requirements of the foundry received coke from Waldenburg. On the other hand, a ~~coking plant~~ was dispatched daily from Huta Bobrek to Odertal ~~plant~~ (Q 51/X 99) in 1952.
